

Uplit and Backlit Panels

Lighting for Impact's LED uplit panels help you simply and affordably transform the way your customers see, shop, and spend in your store. Highlight your special products individually by shelf, or as a complete section/end-cap. Our LED panels come in standard shelf widths/depths, making it easy to add to existing shelving. Panels snap into place on top of the shelving to secure the panel and maximize impact.

OVERVIEW

Durable for long lasting use.

Designed for products to be placed directly on top.

Thin, low-profile structure.

Utilize power through existing Lighting for Impact power system.

Works great lighting up beverage sections.

Use with flat shelving.

PANEL SIZES

Lighting for Impact's Uplit Panels come in multiple sizes, so you can uniquely brighten your product no matter where it is! Many standard sizes available based on common shelf sizes.

In addition, built-to-order sizes and shapes are available.
