

# Back-Lit Header Panels

## OVERVIEW

Can be powered with existing Lighting for Impact power systems.

Protectively encased in aluminum framing.

Light guide panel built from optical grade acrylic.

Black and silver frames are standard but can be customized.

T-Slots have been designed into the frames to allow for versatile mounting.

Panels come in different shapes and sizes depending on your needs.

Different mounts are available for different uses.

Improve in-store navigation or highlight a specific brand easily.

LEDs used in panel are standard 5000k in color.
