

# T-Series Power System

Our T-Series Power System uses extensions under the base deck of gondolas to connect multiple power supplies in series. The T-Series connections pair with any of our power supplies to accommodate multiple power strips up to 8-feet apart and in series of 12 — for gondola runs up to 96 feet long.

**FEATURES:**

- Power from single 110V outlet, connect up to 10 power supplies in series
- Fully concealed under base deck
- 84-24W capacity at each power strip
- Up to 1000 Watt capacity in single run
- LED indicator for power on notification
- Heavy gauge wire used to ensure power is conducted efficiently

**SHARE YOUR MESSAGE**

Leverage power down the aisle like never before.

A single run lets you power all shelf channels, valance lights, backlit header panels, uplit panels. It's also compatible with LCD displays and IoT solutions. Future-proof your store today!
